

Frequency Table

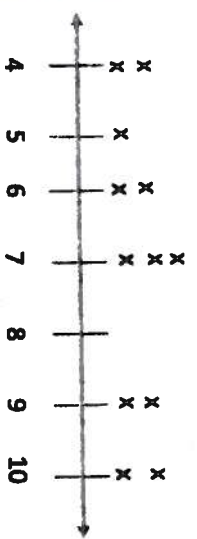

Waist-to-floor measurement (inches)	Frequency	
	Tallies	Number
27		2
28		0
29		5
30		8
31		7
32		4

Length of Greek Temples in Words

Histogram

Line Plot

Shoe Sizes of 7th Grade Students

Uses tally marks to show how many times each piece of data appears. If data is numerical, each table should have an Interval which separates the scale into equal parts.

Similar to a bar graph but the bars must touch! The x-axis shows the intervals, NOT individual data points! Y-axis shows frequency.

Shows the frequency of data on a Number line! Easily identify outliers, gaps (large spaces), and clusters (data grouped closely together).
Shows individual data!
