

## Stem-and-Leaf

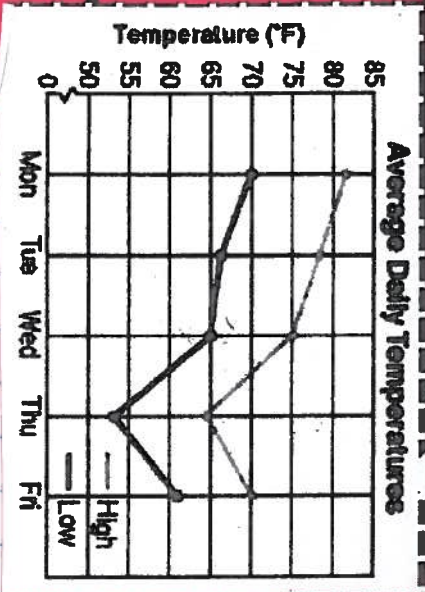

Organizes data *in order* with the greatest place value forming the stem and the least place value forming the leaf. Easily find min, max, range, MMM.

## Circle Graph

Shows individual data! Shows the percentage or fraction of data as parts of a whole. The entire circle represents 100% of the data. If data is not in percent form, you must add up all sectors to find the total amount of data.

## Line Graph

Shows continuous change on a number line. This type of graph allows us to notice trends and make predictions.  
Shows individual data!
