(5) $146\% = \frac{146}{100} = 1\frac{46}{100} = 1\frac{23}{50} = 1.46$

(6) $785\% \quad \frac{785}{100} = 7\frac{85}{100} = 7.85$

(7) $15.5\% \qquad D \longleftrightarrow P \qquad 15.5\% = 0.155$

$= \frac{155}{1000} = \frac{31}{200}$

(8) $7\frac{3}{4}\% \rightarrow 7.75\%$

$D \longleftrightarrow P$

$= 7.75$

$= 0.0775 = \frac{775}{10000} = \frac{155}{2000} = \frac{31}{400}$
