

Experimental Design

Block

1. The purpose of the study is to determine the effect of the independent variable on the dependent variable.	2. The independent variable is the variable that is manipulated by the researcher.	3. The dependent variable is the variable that is measured by the researcher.
4. The experimental design is the plan for conducting the study.	5. The experimental design should be able to control for confounding variables.	6. The experimental design should be able to measure the dependent variable accurately.

1. The purpose of the study is to determine the effect of the independent variable on the dependent variable.

2. The independent variable is the variable that is manipulated by the researcher.

3. The dependent variable is the variable that is measured by the researcher.

4. The experimental design is the plan for conducting the study.

5. The experimental design should be able to control for confounding variables.

6. The experimental design should be able to measure the dependent variable accurately.
